**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5, 6, 14, 15, 24, and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is structurally unclear in these claims how reflectors placed on a conduit can define both "inner" and "outer refueling limits".

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1, 3-7, 9, 10, 12-16, 18-20, 22-26, 28-31, and 33-35 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by von Thal et al.

See especially Figure 3 and column 5, lines 31-35; and column 7, lines 8-24.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2, 11, 21, and 32 rejected under 35 U.S.C. 103(a) as being unpatentable over von Thal et al in view of Stump et al.

Von Thal et al disclose a conduit for aircraft refueling comprising all claimed elements including reflectors placed upon the conduit. Von Thal et al fail to show the reflectors comprising glass beads. Stump et al teach that it is known to make reflectors with glass beads. See especially column 5, lines 39-50. Motivation to combine is the mere substitution of a particular reflective means for an unspecified one. To employ the teachings of Stump et al on the conduit of von Thal et al and have the reflectors include glass beans is considered to have been obvious to one having ordinary skill in the art.

7. Claims 8, 17, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over von Thal et al in view of Krispin et al.

Von Thal et al is applied as above except it fails to show a hose as the conduit. Krispin et al teach that it is well known to have a hose as the conduit of an aircraft refueling system. Motivation to combine is the mere substitution of a hose for a boom in order to perform the same fuel transfer function. To employ the teachings of Krispin et al on the refueling system of von Thal et al and have a hose as a conduit is considered to have been obvious to one having ordinary skill in the art.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hunn et al, Ruiz, Gladfelter et al, and Cozad are cited as being of interest since they disclose conduit systems.
